

Nazir Ahmad Khan

Frontend Developer

+92-349-9308179 | nazirahmadkhantk@gmail.com | [Github](#) | [Linkedin](#) | Karachi, Pakistan

SUMMARY

Frontend-focused web developer with strong fundamentals in HTML, CSS, JavaScript, and React.js, experienced in building responsive and interactive web applications. Comfortable with modern UI tools like Tailwind CSS and Bootstrap, and familiar with wordpress & Ecommerce. Focused on writing clean, maintainable code and continuously improving through real-world projects and collaborative development.

SKILLS

- **Languages:** HTML, CSS, JavaScript.
- **Frameworks/Library:** React.js, Bootstrap, TailwindCSS & Material UI, WordPress.
- **Office Tools:** Office Automation, Design Tools.
- **Soft Skills:** Teamwork, Problem-Solving and Communication skill.
- **Languages:** English, Urdu and Pashtu.

Projects

Personal Portfolio Website

Technologies: React.js, Vite, Tailwind CSS v4, Motion (motion/react), React Icons, Responsive Design

- Designed and developed a fully responsive single-page portfolio using React and Vite with a modern dark-themed UI.
- Implemented reusable component architecture (Navbar, Hero, Skills, Projects, Contact) with structured data management via centralized constants file.
- Integrated scroll-based animations and staggered transitions using Motion for enhanced user experience and performance-optimized effects.
- Built custom scrollspy hook to dynamically highlight active navigation sections during page scroll.
- Developed animated skill progress bars, interactive project cards with hover overlays, and smooth scroll navigation.
- Implemented mobile-first responsive design with animated hamburger menu and adaptive grid layouts.
- Optimized production build and deployed a performant static site with clean code organization and scalable structure.

[Live Demo](#) [Source Code](#)

Quiz App (Frontend Web Application)

Technologies: TypeScript, Vite, Tailwind CSS, Framer Motion, Zustand, React Router, LocalStorage

- Developed a responsive multi-category quiz platform with 100+ static questions across 6 subjects.
- Implemented dynamic quiz flow with timer logic, scoring system, difficulty levels, and animated question transitions.
- Built polished glassmorphism UI with dark/light theme toggle and persistent state using localStorage.
- Designed interactive user feedback including animated progress bars, score counters, and confetti for high scores.
- Created leaderboard system with category filtering and score persistence without backend integration.

[Live Demo](#) [Source Code](#)

Weather App (Real-Time Weather Dashboard)

Technologies: HTML, CSS, React, Vite, JavaScript, OpenWeather API, CSS

- Built a dynamic weather dashboard that fetches and displays real-time weather data by city using the OpenWeather API.
- Implemented search functionality to look up any city and show current weather metrics like temperature, humidity, wind, pressure, visibility, and UV index.
- Designed clean, user-friendly UI with weather icons and responsive layout for improved user experience.
- Managed React state and async API integration to handle real-time data fetching and dynamic rendering.
- Practiced clean code organization with modular components and API error handling.

GTM Sales Development Platform (B2B Marketing Website)

Technologies: HTML5, CSS3, JavaScript, React.js, React Router, Vite, Responsive Design.

- Developed a responsive B2B sales development website using React and Vite, showcasing SDR, outbound, inbound, and data solutions services.
- Built modular and reusable React components for hero sections, service blocks, ratings display, and multi-step process workflows.
- Implemented client-side routing using React Router for smooth navigation across service, pricing, and resource pages.
- Designed conversion-focused UI with structured call-to-action sections, lead capture forms, and enterprise-style layout architecture.
- Optimized performance and deployed the production-ready application on Vercel.

Achievements

- Built and deployed 3 production-ready React applications including a multi-category Quiz App, real-time Weather App, and B2B GTM platform.
- Implemented advanced state management and custom hooks (timer logic, theme persistence, scoring engine) in complex frontend applications.
- Integrated third-party APIs to fetch and render real-time weather data with asynchronous handling and error management.
- Designed and developed fully responsive, conversion-focused UIs with modern component architecture and reusable patterns.
- Engineered interactive features such as animated transitions, leaderboard persistence, dark/light mode, and dynamic routing.
- Successfully deployed live applications using Vercel with optimized production builds.
- Structured large-scale frontend projects with clean folder architecture and scalable component organization.

Education

BSc in Computer Science

Gomal University, Dera Ismail Khan
